The Department of Biology at the Massachusetts Institute of Technology is conducting faculty searches for positions based in three sections of the department: the Main Biology Building, Whitehead Institute, and Broad Institute. In all cases, successful applicants are expected to develop and lead independent, internationally competitive research programs, and to share our commitment to undergraduate and graduate education by teaching courses and supervising graduate and undergraduate research. Candidates must hold a PhD and/or MD, or equivalent. Candidates may apply to all of these searches, but must submit a separate application for each section. See (https://biology.mit.edu/) for information about the searches.

Broad Institute and MIT Department of Biology (https://www.broadinstitute.org) seeks applications for a tenure-track faculty position. Broad Institute is a partnership of MIT, Harvard, and five Harvard hospitals, with a mission to propel the understanding and treatment of disease. The successful candidate will serve as a Core Faculty Member at Broad Institute and an Assistant Professor of Biology at MIT. We seek an outstanding scientist whose independent research program would thrive in and enrich this environment. The search is open to candidates pursuing a broad range of biological questions and approaches. We encourage candidates whose research will bring new areas of inquiry to the Broad, as well as those whose work will lead to fundamental insights into mechanisms of human disease. Additional information about the search can be found at http://www.broadinstitute.org/careers.

To apply, submit application materials to: https://academicjobsonline.org/ajo/jobs/6077

Completed applications will be reviewed starting October 15, 2015.

MIT and the Broad Institute are affirmative action employers and encourage applications from women and underrepresented minorities.
