The Department of Biology at the Massachusetts Institute of Technology is conducting faculty searches for positions based in three sections of the department: the Main Biology Building, Whitehead Institute, and Broad Institute. In all cases, successful applicants are expected to develop and lead independent, internationally competitive research programs, and to share our commitment to undergraduate and graduate education by teaching courses and supervising graduate and undergraduate research. Candidates must hold a PhD and/or MD, or equivalent. Candidates may apply to all of these searches, but must submit a separate application for each section. See (https://biology.mit.edu/) for information about the searches.

MIT Department of Biology - Main Building (https://biology.mit.edu/) seeks an outstanding scientist for a tenure track position at the Assistant Professor level. The applicant's research program should involve, but is not limited to, the study of molecules, cells, organisms, and/or the interactions among them, using the tools of genetics, biochemistry, biophysics, cell and molecular biology, and/or computational biology.

To apply, submit application materials to: https://academicjobsonline.org/ajo/jobs/6054
Completed applications will be reviewed starting October 15, 2015.

MIT is an affirmative action employer and encourages applications from women and underrepresented minorities.
