The Department of Biology at the Massachusetts Institute of Technology is conducting faculty searches for positions based in three sections of the department: the Main Biology Building, Whitehead Institute, and Broad Institute. In all cases, successful applicants are expected to develop and lead independent, internationally competitive research programs, and to share our commitment to undergraduate and graduate education by teaching courses and supervising graduate and undergraduate research. Candidates must hold a PhD and/or MD, or equivalent. Candidates may apply to all of these searches, but must submit a separate application for each section. See [https://biology.mit.edu/](https://biology.mit.edu/) for information about the searches.

**Whitehead Institute and MIT Department of Biology** ([http://wi.mit.edu/](http://wi.mit.edu/)) seeks an outstanding scientist for a tenure track faculty position at the Assistant Professor level. Whitehead Institute is a non-profit research institution dedicated to improving human health through basic biomedical research. Wholly independent in its governance, finances, and research programs, Whitehead shares a close affiliation with Massachusetts Institute of Technology through its faculty, who hold joint MIT appointments. The successful candidate will serve as a Member of Whitehead Institute and an Assistant Professor of Biology at MIT. We are interested in candidates who are pursuing fundamental problems in biology. Areas of interest include but are not limited to development, cell biology, adult biology (including adult stem cells), human genetics, structural biology, chemical biology, and computational biology.

To apply, submit application materials to: [http://facultysearch.wi.mit.edu/](http://facultysearch.wi.mit.edu/)

**Completed applications will be reviewed starting October 15, 2015.**

MIT and the Whitehead Institute for Biomedical Research are affirmative action employers and encourage applications from women and underrepresented minorities.
