

Colloquium Series Fall 2019

Time & Location: 4pm in 32-123, unless otherwise noted

SEP 10, 2019	Alejandro Sanchez Alvarado Stowers Institute The source of regenerative capacity in animals <i>Host: BGSC</i>
SEP 17, 2019	Kay Davies Oxford University Utrophin modulation for therapy of Duchenne muscular dystrophy <i>Host: Richard O. Hynes</i>
SEP 24, 2019	David Baker University of Washington The coming of age of de novo protein design <i>Host: Postdoctoral Association</i>
OCT 1, 2019	Borden Lacy Vanderbilt University Structure and functions of the Clostridium difficile toxins <i>Host: Becky Lamason</i>
OCT 8, 2019	Elizabeth Winzeler University of California, San Diego Chemical genetics, genomics and the search for new antimalarial drugs <i>Host: Sebastian Lourido</i>
OCT 22, 2019	Norbert Perrimon Harvard Medical School Inter-organ communication <i>Host: Pulin Li</i>
OCT 29, 2019	Celeste Simon University of Pennsylvania Inflammation, Metabolism, and Tumor Progression <i>Host: Matt Vander Heiden</i>
NOV 5, 2019	Joshua Mendell University of Texas Southwestern TBD <i>Host: Chris Burge</i>
NOV 12, 2019	Ronald Germain National Institutes of Health Imaging Immunity: Using Both Dynamic and Highly Multiplex Static Microscopy to Develop a Detailed Spatiotemporal Understanding of Host Defense <i>Host: Stefani Spranger</i>
NOV 19, 2019	Allan Drummond University of Chicago Rethinking the cellular response to heat shock <i>Host: Mike Laub</i>
DEC 3, 2019	Maria Barna Stanford University Controlling the diversity of proteins that can be produced in specific cells, tissues & organisms <i>Host: Eliezer Calo</i>
DEC 10, 2019	Tim Stearns Stanford University TBD <i>Host: Angelika Amon</i>
