

Colloquium Series Fall 2020

Time & Location: 4pm on [Zoom](#), password MITBiology

SEP 22, 2020

Anita Sil | University of California, San Francisco
[Regulation of cell shape and virulence by temperature in the fungal pathogen *Histoplasma capsulatum*](#)
Host: *Becky Lamason*

SEP 29, 2020

Britt Glaunsinger | University of California, Berkeley
[Controlling the message: Restriction of Host Gene Expression During Viral Infection](#)
Host: *Sebastian Lourido*

OCT 6, 2020

Facundo Batista | Ragon Institute, MIT, Harvard, & MGH
[Informing vaccine design by defining the rules of antibody responses](#)
Host: *Matthew Vander Heiden*

OCT 27, 2020

Tracy Johnson | University of California, Los Angeles
[RNA splicing, chromatin modification, and the coordinated control of gene expression](#)
Host: *Chris Burge*

NOV 3, 2020

Patrick Cramer | Max Planck Institute
[Recent insights into mRNA biogenesis](#)
Host: *Ana Fiszbein and the Building 68 Postdoctoral Association*

NOV 10, 2020

Samara Reck-Peterson | University of California, San Diego
[Microtubule-based transport in health and disease](#)
Host: *Joey Davis*

NOV 17, 2020

Philip Benfey | Duke University
[Underground signaling networks](#)
Host: *Mary Gehring*

DEC 1, 2020

Erin Schuman | Max Planck Institute
Francis O. Schmitt Memorial Lecture: [Neuronal Logistics: Transcriptomes, Translatomes and Proteomes](#)
Host: *Elly Nedivi*,

DEC 8, 2020

Paul Turner | Yale University
[Leveraging evolutionary trade-offs and phage selection pressure to reduce bacterial pathogenicity](#)
Host: *Sebastian Lourido*
