

IAP FACULTY SEMINAR 2023

Visualizing Immune Responses: The Importance of the Lymph Node

Generation and Function of Anti-viral T Cells

Ulrich H. von Andrian, MD

Edward Mallinckrodt Jr. Professor of Immunopathology,
Dept. of Immunology, Harvard Medical School

Program Leader, Basic Immunology, Ragon Institute
of MGH, MIT and Harvard

Tuesday, January 10th, Noon to 1 pm, 68-181

Targeting Lymph Node Location for Tailored Immunity

Joanna Groom, PhD

Associate Professor, National Health and Medical Research
Council (NHMRC)

Investigator Fellow, Laboratory Head, in the Immunology
Division, Walter and Eliza Hall Institute (WEHI), Melbourne,
Australia

Wednesday, January 11th, 9 am to 10 am, 68-181

Spatiotemporal Orchestration of Cellular Immunity

Wolfgang Kastenmüller

Director, Institute of Systems Immunology,
University of Würzburg, Germany

Friday, January 20th, Noon to 1 pm, Luria Auditorium, 76-156

Chemokine-organized Lymph Node Niches Enhance Immune Responses

Andrew D. Luster, MD, PhD

Chief, Division of Rheumatology, Allergy & Immunology

Director, Center for Immunology and Inflammatory
Diseases, Massachusetts General Hospital

Persis, Cyrus and Marlow B. Harrison Professor of Medicine
Harvard Medical School

Friday, January 27th, Noon to 1 pm, Luria Auditorium, 76-156
