

7.341 The RNA World: From the Origin of Life to Modern Medicine

Starting 2/8/2023

Wednesdays 3:00-5:00 PM

Robert Battaglia (rabatt@mit.edu)

You can learn:

- How different RNA enzymes (aka ribozymes) work and why they are essential to life as we know it.
- The role of RNA chemistry and structure in gene regulation, aging, and viral defense.
- How to critically read scientific literature.

Course includes a field trip to Moderna.
